

**Introducing the new Toshiba TY-SP1EU and TY-SP3 EU–
Bluetooth® enabled portable wireless speakers**

- *The TY-SP1EU features a built-in microphone for conferencing use in a compact design*
- *The TY-SP3EU provides a more immersive sound with a 2.1 channel stereo speaker*
- *Both devices feature Bluetooth® streaming that allows the user to source and play music straight from enabled devices.*

London, UK, September 5th 2013 – Toshiba UK today announces two new portable wireless speakers: the TY-SP1EU and the TY-SP3EU. Designed for easy use in a variety of situations – whether having a gathering with friends, or an important phone conference – both speakers offer a highly portable audio outlet.

High quality sound and volume for laptops, smartphones and tablets

With Toshiba's TY-SP portable speakers, it's easy to connect wirelessly to any Bluetooth® enabled deviceⁱ, and stream music or phone calls for clear, crisp audio. Both the TY-SP1EU and the TY-SP3EU allow users to access their favourite music through their tablet, or search through their personal collection on their smartphone, then playback with clarity and volume. Additionally both speakers also feature a line-in jack, so users can connect with non-Bluetooth devices. With this degree of portable connectivity, users can take the party anywhere, and receive high quality audio in every setting.

The TY-SP1EU - Conference with clear, crisp audio

The TY-SP1EU features a highly receptive built-in microphone, perfect for phone conferencing or a hands-free personal call. Incoming audio is projected loud and clear, whilst outgoing sounds are picked up and amplified to ensure a crystal-clear meeting. With the TY-SP1EU, users can get everyone around the table and make sure their ideas are heard, whatever the setting - the compact design makes it easy to carry anywhere, and set it down to conference as soon as you're on location.

The built-in bass radiator produces excellent bass levels meaning when combined with the portable design, the TY-SP1EU is possible to set up anywhere such as at a BBQ, camping, on the beach or just at home.

Available in an arctic white design and weighing just 100g, the TY-SP1EU offers up to 8ⁱⁱ hours battery making it the perfect portable speaker device.

The TY-SP3EU - Super-bass capability

The TY-SP3EU's 2.1 Channel Stereo speaker with 5-watt Bass Booster takes portable audio quality and projection to a new level making it more suited for sharing music with larger groups. The stereo aspect allows for two channel playback, for a more subtle listening experience, while the bass and power of the TY-SP3EU means music that gets parties going. The TY-SP3EU features a sleek and compact design, available in either a matte black or white finish. A rechargeable battery of up to 10ⁱⁱⁱ hours life also allows for extended use throughout the day and night.

Intuitive and quick controls

To complete the functionality of this range, quick button controls are included on both models designed to keep users in full control of their audio functions with just a few touches. The controls are intuitive and highly practical, so it's possible to play, pause, skip, or make and answer calls without interrupting your party or business conversation.

The Toshiba TY-SP1EU and TY-SP3EU portable wireless speakers will be available in Europe during Q4 2013.
